Journal of Computational and Applied Mathematics 33 (1990) 347
North-Holland

Author Index to Volume 33 (1990)

(The issue number is given in front of the page numbers.)

Barone, P., A discrete orthogonal transform based on spherical harmonics (1) 29–34
Bellalij, M., A simultaneous process for convergence acceleration and error control (2) 217–231
Bultheel, A., see **Van Barel, M.** (3) 331–346

Cahlon, B., On the numerical stability of Volterra integral equations with delay argument (1) 97–104
Carstensen, C., On a general ρ-algorithm (1) 61–71
Casasús, L., see **Pérez-Acosta, F.** (3) 297–305
Christiansen, S., A stability analysis of a Eulerian solution method for moving boundary problems in electrochemical machining (3) 269–296

Dagnino, C. and **E. Santi**, Spline product quadrature rules for Cauchy singular integrals (2) 133–140
De Freitas Pinto, R.L.U. and **A. Rios Neto**, An optimal linear estimation approach to solve systems of linear algebraic equations (3) 261–268
Dehesa, J.S., see **Zarzo, A.** (1) 85–96
De Zeeuw, P.M., Matrix-dependent prolongations and restrictions in a blackbox multigrid solver (1) 1–27

El Tarazi, M.N. and **S. Sallam**, Interpolation by quadratic spline with periodic derivative on uniform meshes (3) 307–314

Gautschi, W. and **S. Li**, The remainder term for analytic functions of Gauss–Radau and Gauss–Lobatto quadrature rules with multiple end points (3) 315–329
Goyal, A., see **Iyengar, S.R.K.** (2) 163–169

Hadjidimos, A. and **M. Neumann**, Convergence domains of the SSOR method for a class of generalized consistently ordered matrices (1) 35–52
Hayek, N., see **Pérez-Acosta, F.** (3) 297–305
Hendriksen, E., A weight function for the associated Jacobi–Laurent polynomials (2) 171–180
Herceg, D., M.M. Martins and **M.E. Trigo**, Extended convergence area for the (MSOR) method (2) 123–132
Hovstad, R.M., Continued fractions and irrational functions (2) 157–162

Iyengar, S.R.K. and **A. Goyal**, A note on multigrid for the three-dimensional Poisson equation in cylindrical coordinates (2) 163–169

Karageorghis, A. and **T.N. Phillips**, On efficient direct methods for conforming spectral domain decomposition techniques (2) 141–155

Li, S., see **Gautschi, W.** (3) 315–329

Martins, M.M., see **Herceg, D.** (2) 123–132
McClure, J.P. and **R. Wong**, Asymptotic expansion of a quadruple integral involving a Bessel function (2) 199–215

Nagurney, A. and **L. Zhao**, Disequilibrium and variational inequalities (2) 181–198
Neumann, M., see **Hadjidimos, A.** (1) 35–52

Pérez-Acosta, F., L. Casasús and **N. Hayek**, Rational collocation for linear boundary value problems (3) 297–305
Phillips, T.N., see **Karageorghis, A.** (2) 141–155

Rabinowitz, P., Numerical integration based on approximating splines (1) 73–83
Rios Neto, A., see **De Freitas Pinto, R.L.U.** (3) 261–268
Rodriguez, G. and **S. Seatzu**, Numerical solution of the finite moment problem in a reproducing kernel Hilbert space (3) 233–244
Ronveaux, A., see **Zarzo, A.** (1) 85–96

Sallam, S., see **El Tarazi, M.N.** (3) 307–314
Santi, E., see **Dagnino, C.** (2) 133–140
Seatzu, S., see **Rodriguez, G.** (3) 233–244
Stewart, K., A model for stability of the semi-implicit backward differentiation formulas (3) 245–259

Trigo, M.E., see **Herceg, D.** (2) 123–132

Van Barel, M. and **A. Bultheel**, A new approach to the rational interpolation problem: the vector case (3) 331–346
Van Huffel, S., Partial singular value decomposition algorithm (*Algorithm 32*) (1) 105–112
Van Huffel, S., Partial total least squares algorithm (*Algorithm 33*) (1) 113–121
Volk, W., Making the difference interpolation method for splines more stable (1) 53–59

Wong, R., see **McClure, J.P.** (2) 199–215

Zarzo, A., J.S. Dehesa and **A. Ronveaux**, Newton sum rules of zeros of semiclassical orthogonal polynomials (1) 85–96
Zhao, L., see **Nagurney, A.** (2) 181–198
